

Subject: Application for Head of Technical Training

Dear Hiring Committee,

I am writing to apply for the position of **Head of Technical Training**. With over **7 years of experience in academic leadership, technical training, and placement-oriented program design**, I have led large-scale initiatives **aligning** curriculum delivery with evolving **industry hiring** needs.

In my current role as **Head – Technical Training**, I oversee university-wide programs in **Data Structures, Competitive Programming, AI/ML, and GenAI**, with a strong focus on scalable training models, structured assessments, and measurable learning outcomes.

A key strength of my profile is the development of Code2Crack - an EdTech platform translating training strategy into robust, deployable systems, detailed in **my portfolio**. The platform supports:

- Industry-relevant courses and frequently asked coding problems
- Secure proctored assessments (browser-based and lockdown mode)
- A centralized LMS with end-to-end student progress tracking
- A personalized AI Tutor for tutorials and coding guidance
- Structured learning roadmaps and technical blogs

Building and operating Code2Crack has shaped my approach to training as an integrated ecosystem, combining curriculum design, **institution-grade assessment integrity**, learner analytics, and personalized learner support. These insights directly inform how I design institutional training frameworks, placement pipelines, and faculty-led delivery models.

I am keen to contribute my experience in academic **leadership**, AI-enabled learning systems, and large-scale technical training execution to **strengthen** institutional **training outcomes** and **placement readiness**.

Thank you for your time and consideration.

Warm regards,

Sumit Mohan
Head – Technical Training
